

Are you willing to talk with us about your child's diet or eating habits?

Who is needed: Parents of children with intellectual disabilities (ID) or ID paired with other diagnoses (such as autism, cerebral palsy, genetic conditions, epilepsy etc.)

Why: To help us understand lived experiences of parents with their child's eating habits. Research shows that there are sometimes issues with diet and health with children with ID, but we want to find out why children choose the foods they do and how parents and families experience these choices.

How it will work: One recorded interview (30-45 minutes) by phone, email, or Internet with the researcher about your child's eating habits/dietary issues, with one follow up contact (much shorter) to clarify any statements or questions. Real names and identities will not be shared with anyone but the researchers.

Researchers: MaryAnn Demchak, Ph.D. And Brianna Grumstrup, UNR doctoral student of special education

bgrumstrup@nevada.unr.edu

Or mad@unr.edu

Please email to express interest in participating or to get more information! Participants will receive a \$10 Starbucks gift card upon completion of the interview.
